[Model Policy: Alcohol, Tobacco and Recreational Drugs](#)

Athletics departments are committed to providing a healthy environment in which student-athletes can grow academically and athletically. The misuse of alcohol and use of recreational drugs among the employees and student athletes undermines this commitment. Toward the end of advancing a more healthy athletics and educational environment, we should be committed to education about and prevention of alcohol, tobacco and recreational drug misuse among student-athletes, the rehabilitation of student-athletes who suffer alcohol, tobacco or drug dependence, and policies and programs that may result in the prevention of re-occurrence among those student-athletes who have misused alcohol, tobacco or recreational drugs.

Following is a model policy governing alcohol, tobacco and recreational drugs. It is not a drug-testing policy or procedure document. This is a policy sample that should not be used verbatim. Follow instructions to insert information applicable to your institution and then submit to your legal counsel for review to be sure all elements conform to institutional policy and applicable local, state and federal laws.
